

JOB VACANCY FOR CHARTERED PHYSIOTHERAPIST AT PRESTONS HEALTH

Following an increased demand for our services here at Prestons Health, we have a unique job opportunity for a Physiotherapist wanting to explore a different way of working within Private Practice. We are specifically looking for individuals wanting to work part time (at least initially) on a Saturday morning and evenings during the week.

Who are we looking for?

We are looking for a Chartered Physiotherapist who is seeking a new challenge: a physio that works within an evidence informed, biopsychosocial model of care that can offer patients a client-centred, exceptional experience. This physio will also demonstrate the willingness to explore and develop business skills around how a private healthcare company can integrate this clinical philosophy and thrive beyond a "Fix it again Thanks (FIAT)" model of traditional Private Practice.

The caseload

The ideal candidate will be able to utilise their skill set to treat a wide range of musculoskeletal conditions. There is a need within the role to work with patients with acute and persistent pain states. The skill set of the physiotherapist must be adaptable to whatever comes through the door with people of all ages.

The role is based within our clinic at David Lloyd Club in Peterborough. We can access the full gym facilities and hydro pool with our patients for optimal results. It is Physio heaven!

Continual Professional Development

A passion towards CPD and improving practice for the benefit of the patient is paramount for this role. So is a desire for work satisfaction. Cognitive flexibility is important too.

Hours and rate of pay

The hours of working and pay rates for this role will be explored with the right candidate at interview. It will be a self employed role.

The hours can be flexible but ideally will include some availability for patients to be seen out of their working hours.

Longer term, partnership opportunities within Prestons Health have possibilities for this role.

Team work

Our Multi-disciplinary team consists of a range of different healthcare professionals. The ability to work well as part of that team and inter-refer/liase when necessary is vital (with the ability to recognise their own scope of practice). We have full time reception and administrative support roles as important members of our team but it is necessary for the clinician to be prepared to get stuck in with day to day administrative tasks when necessary.

Work life balance

The candidate will demonstrate good self care and compassion skills towards themselves in achieving a good work life balance.

Benefits of working with us will be the use of the David Lloyd club facilities (the premium club in Peterborough) and swimming pool personally free of charge with access to Nene Park on the doorstep as well as discount within the coffee shop onsite.

And finally.....Sense of humour

Essential. Especially the ability to laugh at one's self.

Interested in this scene becoming your new view from your lunch bench?

Please send your CV and covering letter to our Clinical Director, Helen Preston by email to:
